

Partnership Opportunity

Introduction

Price Spin is a well established UK based company. We have a large presence in the price comparison and affiliate sectors in Europe and USA. Our infrastructure powers more than 20 high profile price comparison websites to date. Until now, we have not had an “own brand” price comparison website as we have been concentrating on perfecting our software and hardware infrastructure.

Between the key members of the team, we have over 60 years collective experience in many sectors including retail, marketing and software engineering.

So what's next?

Price Spin is launching our “own brand” websites between 2012 and 2014. In the UK and some other parts of Europe, we will be managing these websites ourselves and they will be built using our software. However, in countries outside this area we will be looking for a business partner to help us achieve this. We are looking at the possibility of a business partnership at any level. The possibilities we envisage are as follows:

1) **API Data Supplier**

If you are already in the price comparison sector and have an API that we can use, then please get in touch. We have a great in-house development team that could build a website around an XML API. With this type of arrangement, we require a 50/50 revenue share from the revenue of every click to your merchant/retailer we generate. We believe this is a fair arrangement as you will manage the data and we will be generating the targeted leads.

2) **Business Partnership Agreement**

Are you a software developer, or is your company a software development company, in the affiliate or price comparison sector? We are looking at the possibility of a business partner to fully create and manage one of our websites. In order for us to consider this, you or your company must be able to demonstrate a proven track record for solid software development, online marketing and business management.

Partnership opportunities are currently available in the following territories: France, Germany, Spain, Italy, Netherlands, Poland, Australia, New Zealand, India, Romania, Russia & China. If you are from, or do business in, a territory not listed here, we may be interested. Please get in touch.
